Proposal For

Leaf n loaf restaurant

Problem

Point-of-sale system which is currently running in your restaurant is very outdated. Which is causing your company, generating accurate interim reports and sometimes your employees have to double check through manual procedures to verify each report accuracy.

Solution

Our company will develop a well responsive and up-to-date restaurant management system with latest technologies and updated point-of-sale, inventory, and accounting software to enhance the restaurants' in-stock position, contribute to profit increase, improve customer service, and reduce labor and operation costs.

Objectives

- Examine the system which is running now at your restaurants
- Then develop the new updated software
- We will combine various programs into restaurant's system
- Integrate the new software onto the restaurant's system
- Organize employee training accordingly

Benefits

We have over 10 years of experience in this field and developed and managed over 100 software in this time. Customer satisfaction is our main priority. We make sure to develop each software with up-to-date tools and technologies.

Tools

1. C#
2. MS SQL SERVER
3. PHP
